

BrainPOP at Home

Computer programming made simple! Discover, play, and learn with your family.

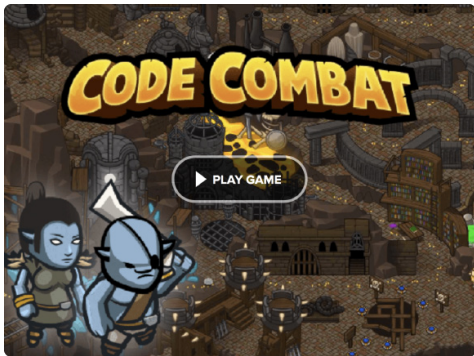

WATCH A MOVIE

Computer Programming

Computer programming is not just for techies! Watch this BrainPOP movie with your family and discover how coding is just like writing instructions. Discussing what you learn extends and deepens your child's understanding. Here are some questions to spark that conversation:

✧ SPARK A CONVERSATION

- *Why does Moby keep doing things wrong? What does Tim need to do to correct Moby?*
- *What everyday things use computer programming?*
- *Why is computer programming an important skill to learn? How might it be a part of your future?*

PLAY TOGETHER

CodeCombat: Ogre Encounter

Fight ogres and gather gems as you code your way through the Kithgard Dungeon!

Run Marco!

Guide Marco through each level by giving instructions in the form of the standard visual programming language.

Time Zone X: Computer Programming

Put your computer programming smarts to the test by placing milestones in time order.

Write an Algorithm

Create an algorithm for a task, such as making your bed. Write the steps in order, identifying variable, condition, and output. Check the program for bugs and iterate as needed.
